STATEMENT OF RELEVANCY

Reference AA (5,805,706) on form PTO-1449:

The present invention relates to a cryptographic device that decrypts information having a first encrypted format that is input the cryptographic device producing information in a non-encrypted format. The decryption and re-encryption operations are accomplished entirely within the cryptographic device.

Reference AB (6,003,117) on form PTO-1449:

This reference is a soft secure memory management unit (SMMU) signals the processor when the processor attempts to access first data which is not within the decrypted data in the main memory, but is within the encrypted data stored in the external memory. When the soft SMMU signals the processor, the processor oversees transfer the data.

Reference AC (5,123,045) on form PTO-1449:

In this reference, not only the values stored in the general purpose memory are hidden, but also the sequence in which memory location are accessed during execution is hidden. The software and data are stored in accordance with a pseudo-random mapping such that the pattern of access reveals no information to adversarial observers.

References AA through AF, AO and AW on form PTO-1449:

These references are mentioned in the Specification.
